

# The quality of education in Gauteng

This vignette should be read together with the February Map of the Month, **The Quality of Education in Gauteng**

This vignette provides a breakdown of the matric pass rates by school type. Graph 1 demonstrates that public no-fee schools have lower pass rates than other categories. Graph 2 shows that districts with low pass rates, such as Johannesburg Central, have high proportions of no-fee public schools. However, this is not the sole determinant as there are districts with higher proportions of no-fee public schools that have better pass rates.
